

PaperClip BarCode

PaperClip BarCode is an add on product providing PaperClip32 users the ability to create barcode document cover sheets allowing for auto capture and indexing. Users navigate friendly screen allowing them to create one or more barcode sheets for printing.

A backend process will then read the scanned barcode cover sheet and auto index the pages into the PaperClip32 document management solution. This process removes the need for manual indexing and provides the capability for remote processing via fax or PaperClip services with **No Programming**.
